

One in three teenagers have experienced dating violence

Working with schools to prevent adolescent dating abuse and violence

The extent of the problem

One in five girls aged 14 - 17 have suffered **physical violence** from their boyfriends

More than four in ten have experienced **sexual coercion** from their boyfriends

Barter et al (2009) Partner exploitation and violence in teenage intimate relationships. NSPCC and Bristol University.

6.2% of young men aged 16 - 19 have experienced **dating abuse** from a partner in the last year

Public Policy Exchange, 2015

Help us make one in three
None in Three

Get involved

If you have any questions or would like to discuss how your school can get involved, please contact us:

How we are involving schools and other institutions in our research

Psychosocial Survey

1 An anonymous and confidential survey of approximately 10,000 10 to 18 year olds will help us understand the experience of **violence and abuse** amongst them.

Game Development

2 Young people will help us design a serious **computer game** by contributing to its direction as well as making the game relatable to them.

Game Trial

3 The **game** will be played by a smaller group of 14 to 18 year olds, using surveys before and after the game to help us measure **attitude and behavioural** change.

Curriculum Design

4 The results of our work will lead to new specific sex and relationships curriculum content, that can be kept by schools and used to help young people understand and prevent **relationship abuse**.

Find out more...

Support will be provided to staff and **game** players.
