**None in Three** is a global research centre which develops and evaluates prosocial computer games to prevent gender-based violence. It is based at the University of Huddersfield and funded by the UK Government's Global Challenges Research Fund (through UK Research and Innovation), with satellite offices in Jamaica, Uganda and in India at ISDI School of Design and Innovation, Mumbai. The Centre takes its name from the fact that, according to the World Health Organisation, one in three women and girls are subject to physical or sexual violence in their lifetime. We aim to make this none in three.
